

DEVESHRI GURAV

Data Analyst

+91 74101 35526 | guravdeveshri@gmail.com | Pune, India | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data Analyst with 4 end-to-end projects across 125,000+ real records, covering SQL, Python, and Power BI. Disproved a stakeholder pricing assumption using statistical analysis ($r \approx 0.04$), identified a customer churn inflection point that informed a retention intervention, quantified a 96.88% customer retention gap using PostgreSQL across a 9-table relational database, and replaced manual reporting with interactive dashboards across 3 domains. GitHub portfolio with documented code available for review.

SKILLS

Languages: Python (Pandas, NumPy), SQL, DAX

Visualisation: Power BI, Tableau, Matplotlib, Seaborn

Analytics: Exploratory Data Analysis, KPI Reporting, Customer Segmentation, Churn Analysis, Statistical Analysis

Engineering: Data Cleaning, ETL Pipelines, PostgreSQL, REST APIs, Reporting Automation

Tools: Excel, Jupyter Notebook, Flask, Git, GitHub

PROJECTS

github.com/Deveshri-Gurav-11

Olist E-Commerce Analysis — SQL & Power BI | PostgreSQL, SQL, Power BI, DAX

> **Key finding:** 96.88% of customers never placed a second order — exposing a critical retention gap across 96,000+ customers.

- Modeled a 9-table relational database in PostgreSQL from 99,441 real orders; wrote 5 business-critical queries using multi-table joins, CTEs, and window functions.
- Quantified a 40% drop in review scores tied to late delivery (4.29 → 2.57 avg) across 7,700+ delayed orders, linking logistics performance to measurable customer impact.
- Built an interactive Power BI dashboard with 5 DAX-driven visuals (revenue trend, category performance, seller benchmarking, retention segmentation) translating SQL findings into a stakeholder-ready view.

Swiggy Business Analysis Dashboard | Python, SQL, Power BI

> **Key finding:** Pricing has near-zero impact on ratings ($r \approx 0.04$) — disproving the assumed correlation across all 15 cities tested.

- Queried and cleaned 7,000+ restaurant records across 15 Indian cities; identified mid-tier pricing (₹150–300) as top satisfaction driver.
- Built Power BI dashboard with drill-through city and cuisine filters, consolidating 6 KPIs into a single decision-support view.

Telecom Customer Churn Analysis | Python, Pandas, Seaborn

> **Key finding:** Month 18 is the churn inflection point — a loyalty intervention at this stage is projected to cut churn by 8–12% in the highest-risk cohort.

- Segmented 7,043 records by contract type, tenure, and ARPU; quantified 31-point churn gap (42% month-to-month vs 11% long-term).

Retail Sales Analytics — Executive KPI Dashboard | Excel, Power BI

> **Key finding:** Replaced hours of manual reporting with a 5-KPI dashboard, surfacing 2 regions with declining margin hidden in raw spreadsheets.

- Analysed 9,994 transactions across regions and product categories; automated reporting workflow end-to-end.

EDUCATION

Parul University (PIT)

2022 – June 2026

B.Tech, Computer Science Engineering, Vadodara, India

CERTIFICATIONS

- Data Analytics Virtual Program — May 2026
- Data Visualisation: Empowering Business with Effective Insights Job Simulation — June 2026

ACHIEVEMENTS & VOLUNTEERING

- Team Lead — PU Code Hackathon 2.0: Led team from ideation to working biometric authentication prototype, coordinating 4 workstreams under a 48-hour deadline.
- Hackathon Completions — Delivered working solutions at TechSpark 2025, PU Code 2.0, and Vadodara 6.0 under time-constrained build conditions.
- Analytics Portfolio — 6-domain portfolio covering data cleaning, EDA, BI reporting, automation, and statistical analysis — all repos public on GitHub.
